Professional Summary

Aspiring Data Analyst with hands-on experience in data cleaning, exploratory data analysis (EDA), statistical analysis, and data visualization using Python, SQL, Excel, Pandas, NumPy, Matplotlib, and Power BI. Experienced in analyzing large structured datasets, performing A/B testing and customer segmentation, and generating business insights through statistical and analytical techniques. Strong foundation in hypothesis testing, KPI reporting, and data-driven decision making.

Technical Skills

Programming: Python, SQL
Data Analysis: Pandas, NumPy, Matplotlib, Excel, Data Cleaning, EDA
Visualization: Matplotlib, Seaborn, Excel Charts, Power BI
Concepts: A/B Testing, RFM Analysis, KPI Reporting, Statistical Analysis

Projects

Landing Page Conversion Optimization using A/B Testing

Python, Pandas, NumPy, SciPy, Matplotlib

- Analyzed 290K+ user interaction records from a landing page A/B testing experiment using Python, Pandas, NumPy, Matplotlib, Seaborn, and Statsmodels to evaluate conversion performance.
- Performed data cleaning, experiment validation, and statistical analysis by verifying traffic split, removing inconsistent mappings and duplicate users, and analyzing user behavior across hourly and weekday trends.
- Conducted a Two-Proportion Z-Test and confidence interval analysis to compare conversion rates between control and treatment groups, identifying that the new landing page did not produce a statistically significant improvement in user conversions.

Customer Segmentation Analysis Using RFM

Python, Pandas, NumPy, Matplotlib, Seaborn.

- Performed customer segmentation analysis on 250K+ e-commerce transaction records using Python, Pandas, NumPy, Matplotlib, and Seaborn.
- Conducted data cleaning, exploratory data analysis (EDA), and feature engineering to analyze customer purchasing behavior and revenue trends.
- Applied RFM (Recency, Frequency, Monetary) analysis to classify customers into segments such as Champions, Loyal Customers, At-Risk Customers, and Lost Customers.

E-Commerce Sales Analysis

Python, Numpy, Pandas, Matplotlib

- Analyzed 50K+ e-commerce transaction records to uncover sales trends, customer purchasing behavior, and high-performing product categories.
- Created 10+ visualizations and business KPIs including Total Revenue, Average Order Value (AOV), monthly sales trends, and top-performing categories.
- Identified high-revenue cities, top customers, and peak sales periods to generate data-driven business insights and recommendations.

Internships

JUN 2024 – AUG 2024 Data Analytics Trainee, Coding Blocks

- Performed data cleaning and preprocessing using Python libraries such as Pandas and NumPy.
- Conducted exploratory data analysis and generated insights using Excel pivot tables and charts.
- Analyzed structured datasets to identify trends and support data-driven business decisions.

OCT 2022 – NOV 2022 IT Support Engineer (L1/L2), Loop Matrix — Defence Expo 2022

- Installed and configured network infrastructure supporting 150+ computer systems.
- Analyzed recurring hardware and connectivity issues to improve troubleshooting efficiency.
- Provided technical support for Ministry of Defence, HAL, Army, Navy, and Air Force teams.

Education

AUG 2022 – 2026 **Shri Ramswaroop Memorial University**, B.Tech in Computer Science
APR 2019 – JUN 2021 **City Nobel Jankipuram**, Intermediate
